YOGAISAN RAMASAWMY

Personal Profile

Having an engineering background and recently completed Le Wagon Bootcamp, I am currently looking to build a career in front-end web development by using all the knowledge acquired during the bootcamp and also through continuous learning. My portfolio can be found here: https://www.yogaisanramasawmy.me.

Projects

My Posh

Ruby on Rails

- Worked on a project in a team of four. The project was to build a web app which would enable people to rent wedding attires and jewelry at a reasonable price. The app can be found here: https://my-posh-wedding-rental.herokuapp.com/

Bateau

Ruby on Rails

- Worked on this project also in same team of four. The project aim was to build an online Learning Management System web app for students and teachers in Mauritius. The project can be found here: https://bateau712.herokuapp.com/
